

Email remains the most effective way to communicate with your customers and prospects to drive crucial engagement. Built for developers and designed for marketers, SendGrid is the world's largest cloud-based email delivery platform. Developers enjoy simple SMTP and Web API integrations while non-technical users can leverage an intuitive user interface to create, send, and analyze email marketing campaigns.

With unmatched deliverability, scalability, and support, SendGrid makes email easy.

Proven Deliverability

30+ deliverability experts, ISP monitoring and outreach, and rigorous compliance standards protecting our high quality senders.

Scale with Confidence

Sending 20 billion+ emails per month via our proprietary MTA and distributed infrastructure with built-in redundancy to deliver excellent uptime.

24/7 Global Support

24/7 customer and compliance support, dedicated technical account managers for Premier accounts, and robust documentation.

Leverage SendGrid's powerful, intuitive sending tools to deliver **transactional** and **marketing** emails
